great barn farm

Help us to re use, recycle and reduce waste.

If you've read our sustainability page you will know what we are trying to do to minimise our environmental impact. There is always more to do but this is how you can help.

Shop local – our Touchstay app will give you all the great local places to shop and support small independent business.

Conserve energy – Switch off the lights when you leave to go out for the day.

Conserve water – don't leave the taps running while brushing your teeth. Wash vegetables and fruit in a bowl instead of running water and when using the kettle only boil what you need.

Say no to plastic – Make sure you have some re usable bag to take with you (we have left some in the barn for you but please leave them for the next guests) and when your going out fill up with water before you leave instead of buying single use bottles.

Waste – make sure you recycle using our recycling bins provided as much as you can and use the food waste bins.

Travel thoughtfully – We don't have much public transport here in west and north Norfolk so plan your journey and use the touchstay app to make the most of your trips out.

When you get home – Consider a swap when you get home just one thing you do differently can help. Check out the touchstay app for sustainable bathroom products and kitchen products we use.
